### DETAILED ACTION

1. The Preliminary Amendments filed on November 19, 2003 and August 30, 2004 are acknowledged.

#### *Priority*

2. Acknowledgment is made of applicant's claim for foreign priority based on an application filed in France on 5/24/2000. It is noted, however, that applicant has not filed a certified copy of the 00/06645 application as required by 35 U.S.C. 119(b).

#### *Information Disclosure Statement*

3. This office acknowledge receipt of the following items from the Applicant:  
Information Disclosure Statement (IDS) filed on November 19, 2003.
4. The information disclosure statement filed 11/19/2003 fails to comply with 37 CFR 1.98(a)(2), which **requires a legible copy of each cited foreign patent document**; each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered.

#### *Drawings*

5. Figures 1-2B should be designated by a legend such as **--Prior Art--** because only that which is old is illustrated. See MPEP § 608.02(g). A proposed drawing correction or corrected

Art Unit: 2824

drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

***Specification***

6. The disclosure is objected to because of the following informalities: Figure 5 was not described in the specification.

Appropriate correction is required.

***Claim Rejections - 35 USC § 102***

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

8. Claims 1-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Iwahashi (US. 5,953,274).

Iwahashi discloses in Figs. 16-18C, a ROM circuit including memory cell columns arranged in group of two adjacent memory cell columns (see fig. 16), each memory cell column comprising a plurality of MOS transistors connecting in series and being connected to a bitline (BL1, BL2), each column in the group having a selection means (72<sub>1</sub>, 72<sub>2</sub>) capable of selectively activating /deactivating the column and being controlled by an activation line (see col. 12, lines 15-20) which is connected from column decoder (73) to control gate of selection means (72<sub>1</sub>,

Art Unit: 2824

72<sub>2</sub>) (see fig. 16), wherein the activation line of a column is brought to a ground potential to deactivate the column (see col. 12, lines 20-24). Also, Fig. 16 shows the selection means of a column comprising a MOS transistor in series with the memory cells of the column and arranged at the end of the column not connected to the activation line of the other column of the group. Iwahashi further discloses an amplifier (fig. 17) connecting to the bit lines (BL1, BL2 of fig. 16) connected to the two columns of a same group, wherein the amplifier having means for invalidating the information present on the bit line connected to the deactivated column in the group and having a means for lowering the voltage present on the bit line connected to the deactivated column in the group (see col. 13, line 59 to col. 14, line13).

### *Conclusion*

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Iwahashi (US. 5,877,982) discloses a memory device having circuitry for selecting a block in both read and write modes.

Rao (US. 5,200,922) discloses a flash memory device having a redundancy circuit enabling the redundancy of a row or a column in a memory array.

Sheppard (US. 4,495,602) discloses a multi bit read only memory circuit.
